

PARMA, ITALY

SENIOR SECURITY ENGINEER

YOUR OPPORTUNITY

Sidel is looking for Senior Security Engineer, part of the IT organization, that will be responsible for designing IT security architecture, defining technical security controls for the enterprise infrastructure, designing Identity lifecycle management processes at Group level in accordance with heterogeneous local processes, designing Business Continuity processes and coordinating the Disaster Recovery plan definition, designing security key performance indicators about above areas and performing periodical security assessments. The candidate will also take care of the IT information security management system in terms of design and maintain IT security policies and procedures.

YOUR SCOPE

- Design, develop, implement and monitor a group IT security architecture
- Define technical security controls for the enterprise IT infrastructure
- Design, develop, implement and monitor the Identity lifecycle management processes at Group level in accordance with heterogeneous local processes
- Develop, maintain and publish up-to-date information security policies, standards and guidelines
- Develop and oversee effective disaster recovery policies and standards to align with enterprise business continuity goals
- Coordinate and manage external resources involved in the information security, including interviewing, negotiating contracts and fees
Provide strategic risk guidance for IT projects, including the evaluation and recommendation of technical controls
- Understand and ensure consistent application of policies and standards across all technology projects, systems and services
- Create and deploy information security and risk management training programs for all employees, contractors and approved system users
- Facilitate a metrics and reporting framework to measure the efficiency and effectiveness of the information security program
- Manage control and compliance of the security programs with relevant laws, and to minimize risks and audit findings
Manage security incidents and events to protect corporate assets, intellectual property, data and the company's reputation

YOUR PROFILE

Level of education and languages:

- Bachelor Degree in Information Security, Computer Science, Information Management Systems, or IT-related field or equivalent
- Fluent level of English is a must;
- Italian and/or French is an advantage.

Required experience and skills:

- A minimum of 5 years of experience in a combination of infrastructure, architecture security and information security
- Proven track record & experience in designing IT security solutions such as identity management system, access control infrastructure, strong authentication solution, encryption systems

- Knowledge of common information security management frameworks, such as ISO/IEC 27001, ITIL, COBIT
- Proven track record & experience in developing information security policies and procedures and programmes execution
- Professional security management certification, such as Certified Information Systems Security Professional (CISSP), LA ISO 27001: 2013, Certified Ethical Hacker (CEH)
- Certified Information Security Manager (CISM), Certified Information Systems Auditor (CISA) or other similar credentials
- Availability to travel up to 25 %.

ABOUT SIDEL

The Sidel Group is formed by the union of two strong brands, Sidel and Gebo Cermex. Together, we are a leading provider of equipment and services for packaging liquid, food, home and personal care products in PET, can, glass and other materials.

With over 37,000 machines installed in more than 190 countries, we have nearly 170 years of proven experience, with a strong focus on advanced systems, line engineering and innovation. Our 5,000+ employees worldwide are passionate about providing complete solutions that fulfil customer needs and boost the **performance** of their lines, products and businesses.

Delivering this level of performance requires that we continuously **understand** our customers' challenges and commit to meeting their unique goals. We do this through dialogue, and by understanding the needs of their markets, production and value chains. We complement this by applying our strong technical knowledge and smart data analytics to support maximum lifetime productivity to its full potential.

We call it **Performance through Understanding**.
