### SIDEL AWARDED ACCREDITATION FROM SAFE CONTRACTOR FOR HEALTH & SAFETY EXCELLENCE

In 2016, for the fifth year in succession, Sidel has been awarded accreditation for the company's commitment to achieving excellence in the management of health & safety practices in its activities. The award comes from SAFEcontractor, the leading third-party accreditation scheme that recognises high standards in health & safety management. The accreditation mainly focuses on the activities and practices of Sidel's employees as they carry out their duties in line with the company's health, safety and environment group procedures on customers' sites.

Health and safety is a fundamental part of Sidel's operations and its ongoing commitment to sustainable practices. "Our intention is to pursue the highest standards and the safest working practices in everything that we do as an organisation," comments Stéphane Aymonier, Corporate HS&E Director at Sidel. "To successfully achieve accreditation for yet another year is very satisfying. With a large number of highly experienced engineers working at sites other than our own, this shows that our efforts to minimise the risks to our staff, to our customers and to the public are proving very effective."

#### Minimising risk of accidents

The SAFEcontractor scheme is used by many large organisations as a means of sourcing a competent contractor and Sidel has once again proved its commitment to maintaining an excellent record in health and safety. Under the scheme, organisations undergo a screening process to examine the health & safety procedures put in place and effectively carried out - as well as their track record for safe working. The aim is to determine whether good standards of safety are followed in performing all aspects of the work undertaken and, in doing so, minimising the risk of accidents. Safety audits and other relevant procedures are undertaken on all sites and those people designated to carry out work on the company's behalf require good knowledge and understanding of health & safety practices.

## PRESS ARTICLE

### Health and safety throughout global operations

Sidel has nearly three and a half thousand employees worldwide. At its own sites around the globe, Sidel employs health & safety professionals who provide daily competence advice to staff and the company also uses the support of proven specialists from external organisations. Employees undergo a training programme giving them a good working knowledge of health and safety at a workstation. Field service engineers receive a training focus on all risks that they could face on customer sites. Guidelines give instruction regarding manual handling risk, working at height and other risks, along with PPE (personal protective equipment) and other safety equipment. In addition to providing health & safety training for its own employees, helping to ensure on-site safety for all, Sidel will also carry out training of customers' staff at their own facilities if required.

Further details on Sidel's sustainability practices are available at [sidel.com/sustainability](http://sidel.com/sustainability).

### About Sidel

Our purpose is to help brands protect the product inside, preserve the planet outside and touch the lives of millions of people every day.

We do so by offering complete and modular PET packaging solutions, including people, services and equipment.

Sidel has over 165 years of industrial experience. With 30,000 machines installed in more than 190 countries, we have been helping producers fill beverage bottles for over 85 years, blow them for more than 50 and label them for more than 40. We have over 40 years of aseptic packaging expertise, and were one of the first companies to introduce PET bottles to the beverage industry over 35 years ago.

Part of the Tetra Laval group, Sidel has offices worldwide, including 8 production sites and 8 training centres. All our experts are committed to creating the optimum liquid-packaging solution.

We call it **A Better Match** - for our world, our customers and ourselves.
