SIDE LOADING CASE PACKER FOR RSC AND/OR WRAP AROUND CASES/TRAYS

RSC

WRAP AROUND CASES

A SIDE LOADING SOLUTION FOR RSC AND WRAP AROUND BLANKS TO MEET YOUR SPECIFIC REQUIREMENTS:

Technical characteristics

- Numerous hygiene adaptations
- Same case automation module for both RSC and wrap around blanks
- Extremely compact 4m² footprint
- Ability, within the same footprint, to seal cases with glue or tape
- Case magazine height lowered to 850mm to improve blank handling by the operator
- Collating system adapted to the nature, shape and rigidity of the product

Advantages

- Absence of product retention zones so that products fall directly on the ground, at the infeed, collation and loading stations, thanks to sloping plates
- Improved operator access to the case handling part, in particular the loading station
- Size changeover times optimised thanks to centralised setting points and the integration of changeover assistance via IVO digital counters (as an option)
- Integration of labeller and/or ink jet coder, whatever the machine configuration
- Optional control of products at the infeed by integrated vision system

Performance

- For requirements in terms of speed and smooth handling, the loading operation can be carried out by a "Pick & Pack" gripper: pneumatic, mechanic, robotic, 2-axis, 3-axis, 6-axis, or Scara
- Speed: up to 13 cases per minute depending on the type of product and collation

- Forming, side loading and sealing on a single machine for three types of packaging
- Patented case extraction system
- Very compact and uniform unit
- Advanced ergonomics and accessibility
