PET SOLUTIONS

Drying GEBO OPTIDRY

- High precision and low energy consumption for perfect drying efficiency
- Speeds depending on the application
- Optimal drying thanks to adjustable plenum positioning and unique nozzle design

Carbonating/mixing SM BLENDFILL

- It combines the carbonator/mixer and the filler's tank into one single and smart system driving for high performance at reduced costs
- Minimal footprint
- Reduced energy and chemical consumption

Filling SF100 FM STILL DRINKS

- High hygiene for great food safety
- From 12,000 bph to 90,000 bph
- Contactless electronic-volumetric filling

Filling SF300 FM CARBONATED AND STILL DRINKS

- High accuracy with fast format changover
- From 12,000 bph to 80,000 bph
- Electronic-volumetric filling

Coating ACTIS

- Increased shelf life and lightweighting
- Up to 40,000 bottles per hour
- Optimal production uptime and operational performance

Blowing EVOBLOW

- Top consistent bottle quality
- From 12,000 bph to 90,000 bph
- Reduced electricity and air consumption

SUPER COMBI

- Preform feeding, Blowing, Labelling, Filling and Cap feeding in one smart solution
- From 20,000 bph to 90,000 bph
- Compact footprint and high-end technology

COMBI

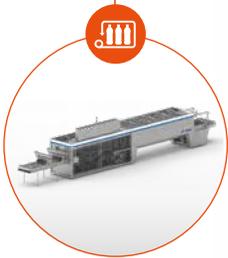

- Preform feeding, Blowing, Filling and Cap feeding in one integrated solution
- From 12,000 bph to 90,000 bph
- Compact footprint

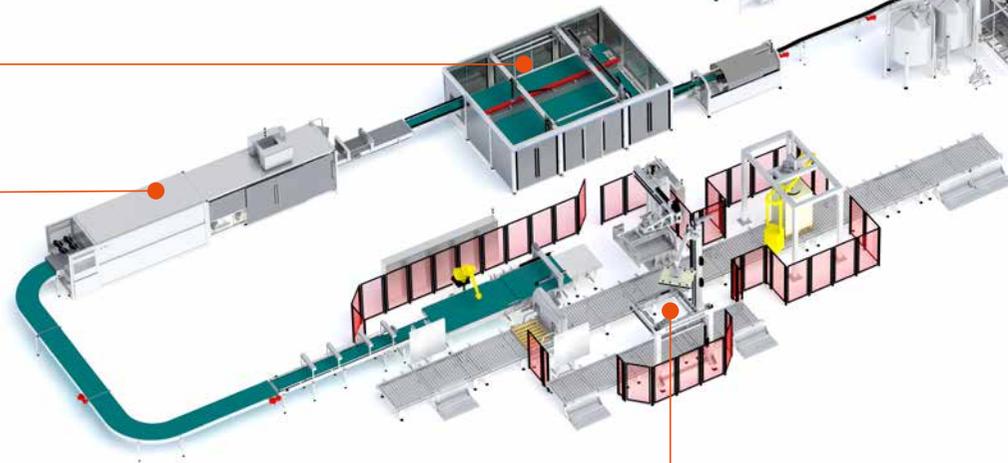

Conveying GEBO AQFLEX

- Best performance thanks to high flexibility product handling and accumulation in an all-in-one solution
- Fastest single-file accumulation from 1,000 to 100,000 products per hour
- Smart product handling principle coupled with proven logic motion technology

Shrink-wrapping EVOFILM

- High-quality shrink-wrapped packs
- Robustness and maintainability for speed up to 120 cycles per minute
- Easy operability and flexibility, 5-minutes fully automatic changeover

Palletising EVOFLEX COLUMNAR PALLETISER

- Double lifting unit on a single central column for a greater machine accessibility
- Fastest low-level palletiser on the market: up to 12 layers per minute
- Advanced and user-friendly experience with tablet-based multi-touch panel PC

Cap feeding GEBO OPTIFEED

- 100% closure compliance at capper infeed thanks to embedded vision control
- From low to high speed up to 92,000 closures per hour
- Smooth waterfall sorting principle and high performance vision control technology

Labelling EVODECO ROLL-FED

- High outputs at high-level efficiency
- from 34,000 bph to 90,000 bph in Super Combi configuration
- Roll-Fed technology for wrap-around plastic or paper labels

Labelling EVODECO ADHESIVE

- Top quality label application
- From 6,000 bph to 66,000 bph
- Pressure sensitive for self-adhesive plastic or paper labels

Labelling ROLLQUATTRO EVO

- Unique linear design for faster and smoother operation
- Up to 42,000 bph
- Roll-Fed technology for wrap-around plastic or paper labels

Preform feeding EASYFEED

- Safe and easy to operate
- Great preform integrity
- Maximum uptime and flexibility

GLASS SOLUTIONS

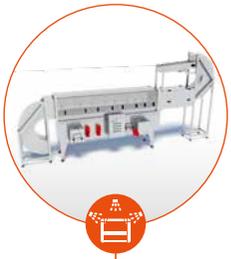

Conveying – One way and Returnable **GEBO AQ-HC**

- High capacity and pressureless mass accumulation particularly suited to high speed lines with large production flow variations
- Up to 120,000 containers per hour
- Simple mechanical design with mobile end guide

Conveying – Returnable **GEBO AQFLEX**

- Best performance thanks to high flexibility product handling and accumulation in an all-in-one solution
- Fastest single-file accumulation from 1,000 to 100,000 products per hour
- Smart product handling principle coupled with proven logic motion technology

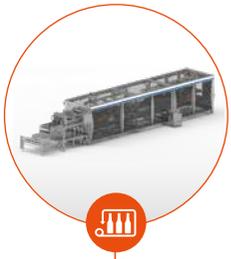

Crate washing **CRATE WASHER**

- High efficiency washing solutions offering energy saving and optimised operability
- Up to 6,000 crates per hour
- Available in 1 or 2-tunnel configurations

Decrating – Returnable **DECAROBOT**

- Specifically designed for rapid format changeovers
- Bottle handling by means of individual pneumatic grippers, adapted to the various sizes of crates
- Movements controlled by self-braking brushless motors

Wrap Around Packing – One way **VERSAWRAP**

- Continuous motion solution delivering a 98% efficiency with 9 servo-motors
- High-speed: up to 65 cycles per minute
- 2-step blank destacking process for high reliability

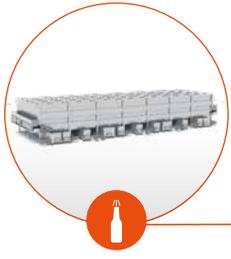

Crating – Returnable **INCAROBOT**

- Specifically designed for rapid format changeovers
- Bottle handling by means of individual pneumatic grippers, adapted to the various sizes of crates
- Movements controlled by self-braking brushless motors

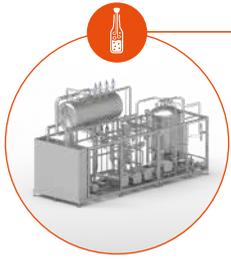

Bottle warming **EVOWARM**

- Highly compact and ergonomic warmer offering significant energy and steam savings
- Suitable for medium-high speeds
- Embedding advanced software for temperature predictive control

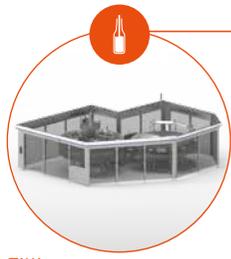

Drying **GEBO OPTIDRY**

- High precision and low energy consumption for perfect drying efficiency
- Speeds depending on the application
- Optimal drying thanks to adjustable plenum positioning and unique nozzle design

Carbonating / Mixing **SM BLENDFILL**

- It combines the carbonator/mixer and the filler's tank into one single and smart system driving for high performance at reduced costs
- Minimal footprint
- Reduced energy and chemical consumption

Filling **EVOFILL GLASS**

- It delivers premium water and CSD with greater format flexibility
- From 25,000 bph and over 80,000 bph
- Electronic level probe filling

Filling **EUROSTAR EV**

- Highly optimised filling performance
- From 25,000 bph and over 80,000 bph
- Electro-pneumatic level filling

Filling **EUROSTAR HS**

- Reliable and simple filling performance
- From 25,000 bph and over 80,000 bph
- Mechanical level filling

Crowns feeding **GEBO OPTIFEED CROWN**

- 100% closure compliance at capper infeed thanks to embedded vision control
- From low to high speed up to 92,000 closures per hour
- Smooth waterfall sorting principle and high performance vision control technology

Labelling **EVODECO COLD GLUE**

- Ultra hygienic fully washable steel structure
- From 6,000 bph to 81,000 bph
- Cold glue technology for partial pre-cut labels
- EvoDECO Multi modular configuration available for utmost labelling flexibility

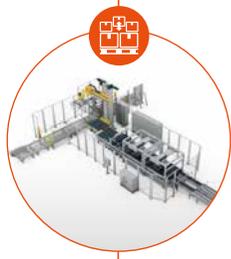

Labelling **EVODECO ADHESIVE**

- Top quality label application
- From 6,000 bph to 66,000 bph
- Pressure sensitive for self-adhesive plastic or paper labels
- EvoDECO Multi modular configuration available for utmost labelling flexibility

Palletising – One way **PALKOMBI**

- Reliable and flexible solution for medium speed lines (up to 5 layers)
- Advanced and user-friendly experience with tablet-based multi-touch panel PC

Palletising – Returnable **EVOFLEX COLUMNAR PALLETIZING SOLUTION FOR CRATES**

- Double lifting unit on a single central column for a greater machine accessibility
- Fastest low-level palletiser on the market: up to 12 layers per minute
- Advanced and user-friendly experience with tablet-based multi-touch panel PC

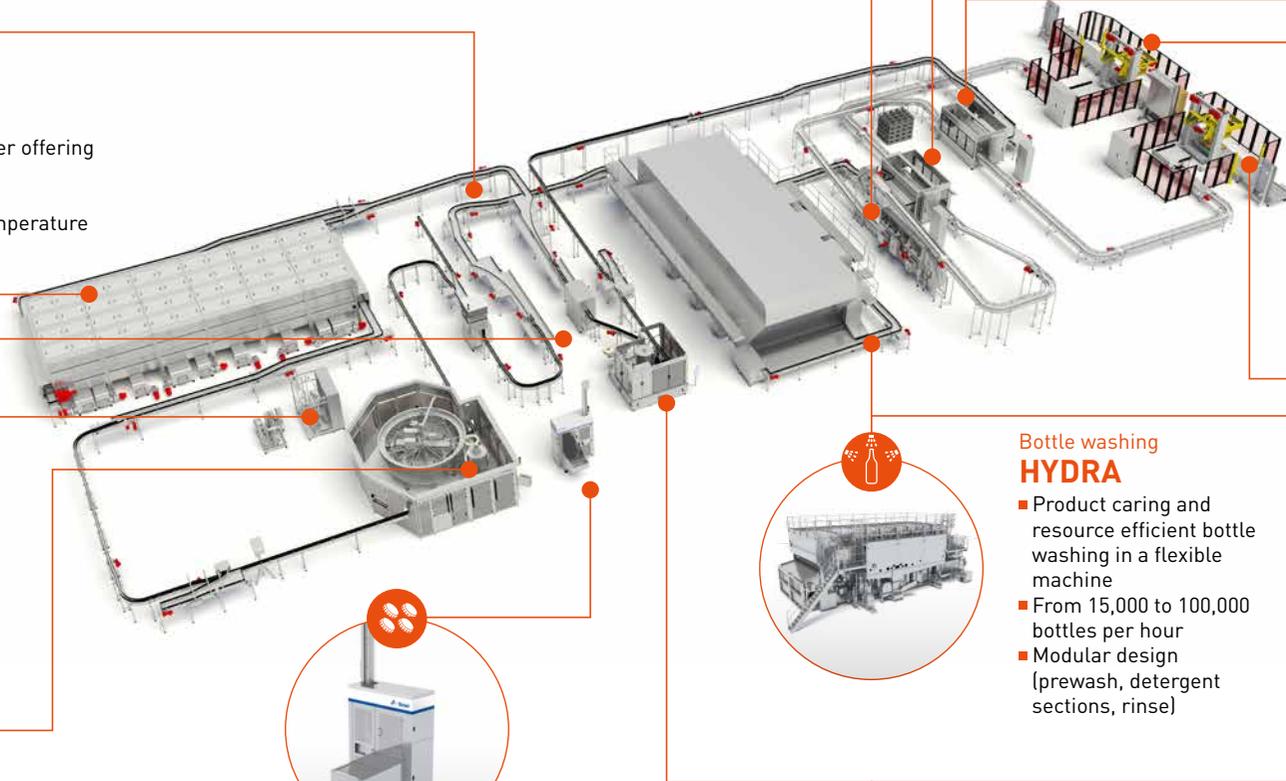

Depalletising – One way **SWEEPOFF A AUTOMATED HIGH-LEVEL DEPALLETISER**

- Simple design to ensure operation efficiency and high performance
- Suitable for high speeds
- Automatic pad/frame/hood removal and pallet conveying and storing

Depalletising – Returnable **EVOFLEX COLUMNAR DEPALLETISER**

- Double lifting unit on a single central column for a greater machine accessibility
- Fastest low-level depalletiser on the market: up to 12 layers per minute
- Advanced and user-friendly experience with tablet-based multi-touch panel PC

CAN SOLUTIONS

Filling **EVOFILL CAN**

- It delivers premium beverages at an advanced performance level
- From 40,000 cph and over 130,000 cph
- Electronic-volumetric filling

Filling **STARCANS MS**

- Compact and simple water and CSD production
- From 10,000 cph to 36,000 cph
- Mechanical level filling

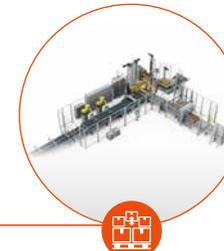

Bottle warming **EVOWARM**

- Highly compact and ergonomic warmer offering significant energy and steam savings
- Suitable for medium-high speeds
- Embedding advanced software for temperature predictive control

Depalletising **SWEEP OFF A AUTOMATED HIGH-LEVEL DEPALLETISER**

- Simple design to ensure operation efficiency and high performance
- Suitable for high speeds
- Automatic pad/frame/hood removal and pallet conveying and storing

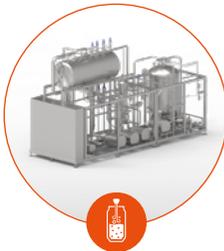

Palletising **EVOFLEX COLUMNAR PALLETISER**

- Double lifting unit on a single central column for a greater machine accessibility
- Fastest low-level palletiser on the market: up to 12 layers per minute
- Advanced and user-friendly experience with tablet-based multi-touch panel PC

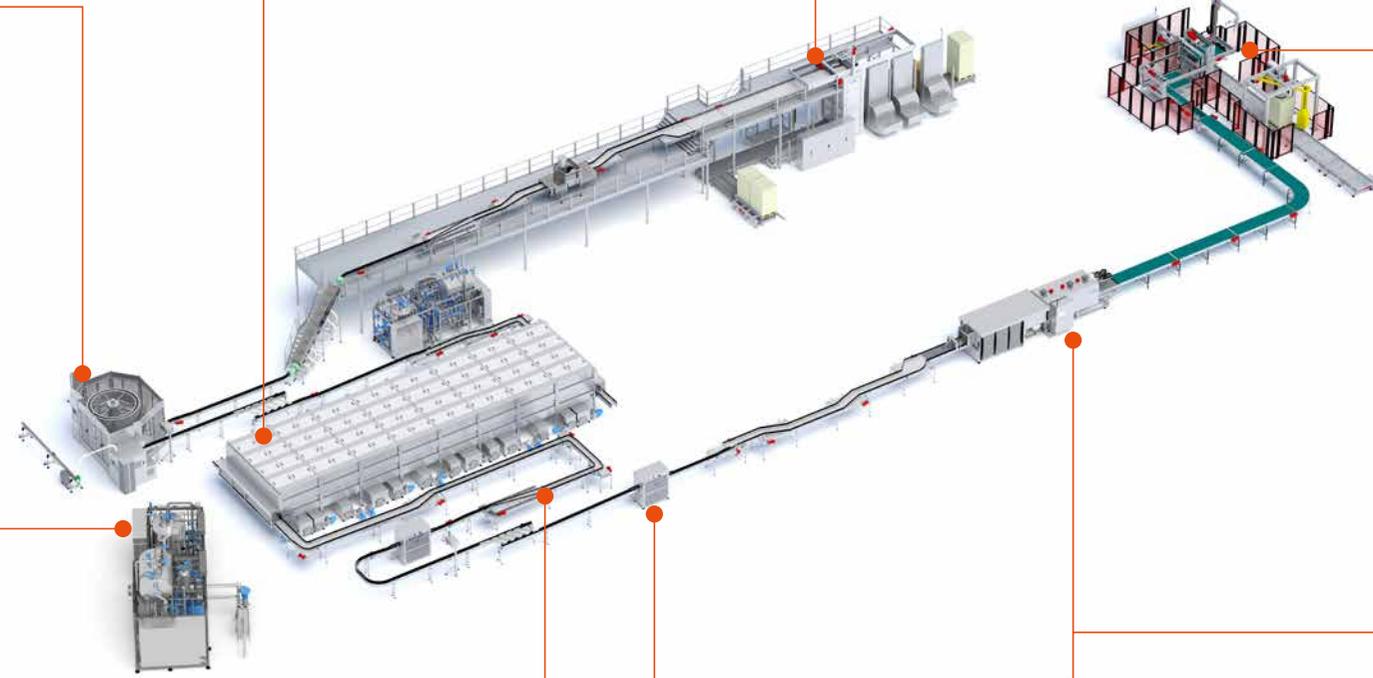

Palletising **PALLINEAR HIGH-SPEED IN-LINE PALLETISER**

- Guaranteed gentle product handling at very high speeds
- High-level infeed and mobile pallet for optimal use of floor space
- High operator safety

Carbonating/Mixing **SM BLEND FILL**

- It combines the carbonator/mixer and the filler's tank into one single and smart system driving for high performance at reduced costs
- Minimal footprint
- Reduced energy and chemical consumption

Conveying **GEBO AQ-HC**

- High capacity and pressureless mass accumulation particularly suited to high speed lines with large production flow variations
- Up to 120,000 containers per hour
- Simple mechanical design with mobile end guide

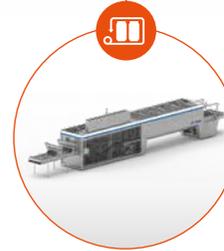

Conveying **GEBO AQ-MAX**

- Large capacity and low-pressure mass accumulation offering optimised space ratio
- Up to 60,000 containers per hour
- Simple and open conveyor design

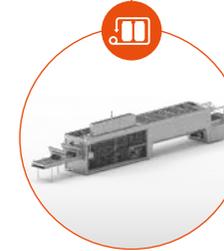

Drying **GEBO OPTIDRY**

- High precision and low energy consumption for perfect drying efficiency
- Speeds depending on the application
- Optimal drying thanks to adjustable plenum positioning and unique nozzle design

Shrink-wrapping **EVOFILM SEAMLESS SHRINK-WRAPPING RANGE**

- High-quality shrink-wrapped packs
- Robustness and maintainability for speed up to 150 cycles per minute (cans) in 3 lanes
- Operability and flexibility, 5 minutes fully automatic changeover

Shrink-wrapping & Packing **VERSACOMBI**

- Largest secondary packaging capabilities to cope with various supply chain needs
- Speed up to 65 cycles/min with Wrap around/Tray & up to 120 cycles/min with film only for small collations
- Easy to operate with one single operator on a compact layout
