LINE IMPROVEMENT

## LAST OPTIONS & UPGRADES RELEASES FOR BLOWERS

To keep your equipment updated over time, our Options and Upgrades (O&U) bring the benefits of the latest packaging technology to your existing lines.

This can result in increased uptime, reduced costs and greater overall production flexibility.

**Options:** New functionalities to optimise flexibility and costs.

**Upgrades:** New technologies to improve performance, safety, functionality, hygiene and energy savings.

### A match for every need

In total, we offer over 500 options and upgrades for every step of the production process, from blow moulding to product preparation, rinsing, filling, pasteurisation and washing. On top of this, around 40 new solutions are launched every year to better meet our customers' needs.

### ALL OPTION TRANSFER ARMS

#### INCREASE RELIABILITY OF THE TRANSFER FUNCTION

Efficiency, Obsolescence – All Blowers Universal

O&U reference: 1,009

### BENEFITS

- Improve system reliability – 2 springs per arm
- Quick adjustment
- Arms body casted and reinforced – better resistance to extra stress

Universal air rotary union on Series 2

PCC Version V3.09

## UNIVERSAL AIR ROTARY UNION ON S2

### REDUCE MAINTENANCE COSTS

Cost optimisation, Efficiency – All Blowers Series 2

O&U reference: 957

### BENEFITS

- Longer lifetime: at least 12,000 hours
- Easy maintenance of the 40 bar circuit (seal kit installed in 30 min if needed)
- Quick on-site installation
- Universal technology available on Series 2

## NEW GUPM PROTECTIVE COVER

### OPERATOR SAFETY IMPROVEMENT

Flexibility – All Blowers Series 2 / Universal

O&U reference: 1,025

### BENEFITS

- The new safety cover will last longer due to reduced fatigue
- Increase operator safety during maintenance interventions
- Quick on-site installation
